

Where the data comes from: city limits (actual temperature) and airport stations (visibility)

Sources: U.S. Census TIGER/Line 2025 Places; Iowa Environmental Mesonet ASOS station metadata; distances from scripts/metar/08b_station_distances.py and scripts/gridmet/02_boundary_audit.py.

City limits (TIGER/Line 2025 Places)
used for gridMET actual temp

METAR airport, inside city limits

METAR airport, outside city limits

City hall (distance reference)

Each panel has its own scale.
Springfield uses Eugene's EUG.
Detroit and Pittsburgh average two airports.
